i 10 good reasons NOT to book your holiday direct

It's tempting to cut out the middle man and book your own holiday on the internet, after all there are thousands at your fingertips and they're all just a mouse click away – but before you part with your hard earned cash, let's talk about some of the events in recent years. In 2017 Hurricane Irma destroyed Club Orient. Monarch airlines went out of business and British Airways and Ryanair air staged a huge number of strikes upsetting and causing holiday chaos for a large number of passengers. More recently, the collapse of Thomas Cook - the worlds' oldest travel firm, sent shockwaves across the country.

All our passengers were quickly and effortlessly re-booked onto alternative flights at no additional cost to them, regardless of the overnight knee jerk reaction brought about by other airlines to inflate their prices. Nobody had to find any more cash, nobody had to put a claim in to the CAA, nobody lost any money on their hotel or apartment because they had booked on a non-refundable rate and nobody had to wait weeks for a refund to be processed before sourcing an alternate flight. Peace of mind is what you are buying into when you book with us.
